

{r2dreamer} end-to-end phase acquisition — ONLINE TRAINING ROLLOUTS, not evaluation

WORLD MODEL (r2dreamer) only — RLPD persists no training-time metrics of this shape and DP is offline.
Training rollouts from the exploring policy, resetting from the TRAINING bank. Endpoints are NOT the table numbers (eval uses mode/sampled actions on rnd30/spots60 at the final checkpoint).
Records carry no record_valid certificate (emitter never deployed); validated structurally instead — 60,233 rows, 0 missing stages, 0 non-binary, 0 implication violations.
