

{r2dreamer} end-to-end, 4.1M steps -- SCORE-DERIVED stage rates, TRAINING rollouts

Score-derived from the staged ladder (picked+1, contact+2, nested+4): score $\geq$ 1 picked, $\geq$ 3 contact, $\geq$ 7 nested. `placed` is a STALE rung, never granted. placed_v2 and slide_success are NOT reward rungs and cannot be recovered from score -- they need the 2026-09-09 stage emission, which postdates these runs. Training rollouts (exploring policy, training bank): endpoints are NOT the evaluation table numbers. Neither arm has plateaued at 4.1M.
