

{r2dreamer} end-to-end phase acquisition — ONLINE TRAINING ROLLOUTS, not evaluation

r2dreamer: ONLINE TRAINING ROLLOUTS from the exploring policy, resetting from the TRAINING bank. DP is offline (no online rollouts) and cannot produce this curve.
Endpoints are NOT the table numbers (eval uses mode/sampled actions on rnd30/spots60, final checkpoint).
Records carry no record_valid certificate (its emitter was never deployed); validated structurally instead — 60,233 rows, 0 missing stages, 0 non-binary, 0 implication violations.
