

{RLPD} end-to-end phase acquisition — ONLINE TRAINING ROLLOUTS, not evaluation

RLPD: ONLINE TRAINING ROLLOUTS from the exploring policy, resetting from the TRAINING bank. DP is offline (no online rollouts) and cannot produce this curve.

Endpoints are NOT the table numbers (eval uses mode/sampled actions on rnd30/spots60, final checkpoint).

Records are the amendment (u) per-episode rollout log (episode_rollouts.jsonl); sticky flags are accumulated across each episode, so a stage counts wherever it occurred, not only at the final step.
